

# FOREST ADAPTATION WEBINAR SERIES

NIACS and the Forest Stewards Guild are teaming up to offer a new webinar series focused on forests and climate change adaptation. The series will bring together scientists and managers to learn about and discuss emerging topics related to the effects of climate change on forest management, with a focus on forests in New England and New York.

Each session will first explore the latest scientific information from someone actively researching the issue, followed by an example of a real-world management project.

*Continuing education credits from the Society of American Foresters are available for each webinar.*

## **Forest Carbon Management and Climate Adaptation**

*December 11 at 12:00pm ET*

Featuring Paul Catanzaro, UMass Amherst; Todd Ontl, NIACS; and Steve Hagenbuch, Audubon Vermont.

## **Assisted Migration**

*January 16 at 12:00pm ET*

Featuring Tony D'Amato, University of Vermont, and Kevin Evans, Dartmouth College.

## **Climate Refugia**

*March 3 at 12:00pm ET*

Featuring Toni Lynn Morelli, Northeast Climate Adaptation Science Center and Rebecca Quinones and Brian Hawthorne, MassWildlife.

## **Warming Winters**

*March 19 at 1:00pm ET*

Featuring Pam Templer, Boston University, and David McMath, Vermont Land Trust.

## **Changing Hydrology**

*April 16 at 12:00pm ET*

Featuring John Campbell, US Forest Service Northern Research Station, and Erin Rodgers, Trout Unlimited.

## **Forest Birds**

*May 21 at 12:00pm ET*

Featuring Steve Matthews, Ohio State University, and Tom Lautzenheiser, Mass Audubon.

## **Regeneration Issues**

*June 25 at 12:00pm ET*

Featuring Kathryn Miller, National Park Service, and Chris Zimmerman, The Nature Conservancy.
