AN OAK MINISERIES FOR FOREST LANDOWNERS

Wildlife, Forestry & Climate Change

Does your woodland have oak trees? If you own land in Southern New England, the answer to this question is most likely 'yes!'

Do you know what birds and animals rely on the oaks in your forest? What are some potential management activities that could help you get the most out of your oak woods? Finally, how will changes in weather and climate affect your woods, and what can you do to prepare for these changes?

Tuesday, April 27

Wildlife

with Brian Hawthorne,
Massachusetts DFW

Thursday, April 29

Forestry

with Fern Graves,
Rhode Island DEM

Tuesday, May 4

Climate Change

with Andrea Urbano,
Connecticut DEEP

****All sessions start at 4 pm EDT****

Join the Forest Stewards Guild and partners for a 3-part series on increasing Oak Resiliency in Connecticut, Massachusetts, and Rhode Island forests.
