

Southeast Member Virtual Guild Gathering
Wednesday May 3, 2023 11 am ET/10 am CT

The Forest Stewards Guild’s spring Guild Gathering will feature a presentation on climate smart forestry in the Southeast. We will be joined by Steve McNulty, director of the USDA Southeast [Climate Hub](#). There will be the opportunity to connect with other Guild members and share updates with each other during Introduction Circles – a Guild tradition!

Pre-approved for 1 SAF CFE

Agenda	
11:00	Membership Updates
11:05	Introduction Circles
11:30	Topic of the Day <ul style="list-style-type: none">Climate Smart Forestry in the Southeast with Steve McNulty, USDA Southeast Climate Hub
12:30	Meeting Close

Speaker Bio

Steve McNulty is director of the USDA Southeast Climate Hub, as well as an ecologist with the USDA Forest Service Eastern Threat Center. Steve collaborates with eight other Hub directors and co-directors across the US. He received his B.S. and M.S. degrees in forestry from the University of Wisconsin-Madison and a Ph.D. in natural resources from the University of New Hampshire-Durham. Steve has published 200+ papers and has given 500+ presentations on climate change impacts and adaptive management options across a range of ecosystems during his 25+ year career. In 2013, Steve received the Forest Service national Research and Development “Distinguished Science Award” in recognition of sustained research productivity, proactive science technology, innovative leadership, applied forest science, and long-time federal service.
