JUNE 10-12, 2026

WILLAPA Bay, WA

# 2026 Northwest Innovative Forestry Summit

## *Restoring Watersheds | Reimagining Forests*

Join us at the Ellsworth Creek Preserve, a property of The Nature Conservancy in southwest Washington, to engage in dialogue and field learning on ecological forestry, watershed restoration, and collaborative land management. A full day of field-based sessions will explore restoration efforts across the Ellsworth watershed—from ancient western redcedar forests to road decommissioning and adaptive management strategies. Partners and Tribal leaders will share practical lessons for collaborative forest stewardship across the Pacific Northwest.

Lodging at Ocean Park Camp and Retreat will be available with registration.
